

Broadreach official Cisco Networkers 2009 Digital Media Systems sponsor

Broadreach Services – 28 September 2009 – Broadreach is pleased to be the official Cisco® Networkers 2009 Digital Media Systems Sponsor, fulfilling digital media services (DMS) requirements at the conference being held in Brisbane, Australia from 28 September-1 October.

Broadreach, an Australian based service provider of visual communications and collaboration solutions, is a certified Cisco partner. Its role at the conference includes working to provide graphic design of all content for digital media, preparing all technical DMS requirements for the event, managing the logistics and providing onsite technical support for the event.

In addition, Broadreach will be providing information on how its Digital Content Management Solution (DCMS) works with the Cisco DMS at the Cisco conference stand. Attendees can contact Broadreach to organise a demonstration of the DCMS at the event.

Broadreach is proud to be working with Cisco on the DMS for the 2009 conference. As a certified Cisco partner, Broadreach values its working relationship with one of the world's leading technology providers.

About Broadreach

Broadreach was founded in 2001 by a team of dedicated IT professionals with a vision to transform the way organisations communicate. Broadreach focuses on the delivery of high-quality, dynamic video and digital media communications. Broadreach enjoys working relationships with the world's best technology providers, including Microsoft, Cisco, Telstra and Radvision.
